EXECUTIVE SUMMARY

This report provides information on the population of Manitoba by Economic Region. It contains data collected by Statistics Canada during the 2001 Census.

The Census counted 1,119,583 Manitobans on May 15, 2001, an increase of 5,685 persons (0.5%) from the 1996 Census count. The Interlake Region recorded the largest increase in Census counts with 3,611 persons or 4.6%. This Region was responsible for 63.5% of Manitoba's growth from 1996 to 2001. The South Central (2.4%), North Central (0.9%) and Winnipeg (0.2%) Regions also recorded growth over the 1996 to 2001 period. Three of the eight Economic Regions experienced decreases in Census counts from 1996 to 2001. The largest of these, the Economic Region of Parklands, decreased by 1,858 persons or 4.0%. The Southwest and North Regions experienced decreases of 1.9% and 0.9% respectively.

According to the 2001 Census 14.0% of Manitoba's total population was aged 65 years and over. Across the province, this share ranged from a high of 21.3% in the Parklands Region, to a low of 5.2% in the North. The Interlake, Winnipeg and North Central Regions were closer to the Manitoba value with 14.2%, 14.1% and 13.7% respectively.

In 2001 Manitoba's percentage of Lone Parent Families (as a percent share of all Census Families) was 16.2%. The North was the Region with the highest share of Lone Parent Families with 25.6%. The only other Region higher than the Manitoba level was the Winnipeg Region at 18.5%. The South Central Region had the smallest share (7.8%), although with 8.9% the Economic Region of Southeast was only 1.1 points larger.

The North Region (68.2%) had the highest share of population classified as having Aboriginal Identity according to the 2001 Census. The Parklands (17.8%) and North Central (15.8%) Regions were the only other Economic Regions higher than Manitoba as a whole (13.6%). The South Central Region had the lowest share reporting Aboriginal Identity with 2.2%. The Southwest Region, with a share of 8.0%, was the next lowest, while the Winnipeg and Southeast Regions both reported shares of 8.6%.

Across Manitoba the Average Employment Income (for the 2000 calendar year) ranged from a low of $20,324 in the Parklands Region to a high of $28,166 in the Winnipeg Region. The only other Economic Region higher than the Manitoba level of $27,178 was the Interlake Region with $28,074.

According to the 2001 Census, the Unemployment Rate for Manitoba females was 5.7% provincially. Rates ranged from 4.1% in both the Southeast and South Central Regions, to 14.1% in the North Region. The range was slightly larger for Manitoba males, ranging from 3.2% in the South Central Region, to 19.5% in the North Region. At the provincial level, males had an Unemployment Rate of 6.3%.

INTRODUCTION

This report has been prepared by the Manitoba Bureau of Statistics. It contains socio-economic information, on a regional basis, provided by Manitobans during the 2001 Census. The regions used in this profile are Manitoba's eight Economic Regions. The eight Regions (also known as Official Regions for Data Collection) are aggregations of the 23 Census Divisions as follows:

Economic Region	Census Division
Southeast	1, 2, 12
South Central	3, 4
Southwest	5, 6, 7, 15
North Central	8, 9, 10
Winnipeg	11
Interlake	13, 14, 18
Parklands	16, 17, 20
North	19, 21, 22, 23

This detailed Economic Region profile presents the characteristics of residents within the Region as well as providing a comparison to Manitoba level data. Population counts are also provided from the 1986, 1991 and 1996 Censuses.

For further information on this profile, or to order, please contact Wilf Falk at 945-2988 or Joanne Boivin at 945-2999.

NOTES TO USERS:

Coverage

It is important to note that although every effort is taken to ensure the quality of the 2001 Census, the data is still subject to error. In general, the following types of error occur: coverage, non-response, response, processing and sampling.

The population counts provided in this document are most influenced by the coverage errors. Coverage error occurs when persons or dwellings are missed, incorrectly enumerated or counted more than once. Statistics Canada conducts three studies in order to estimate the coverage error. The Dwelling Classification Study confirms the vacant/non-vacant status of dwellings, and the resulting information is used to adjust the final census counts. The Reverse Record Check Study estimates the residual undercoverage (persons missed) for Canada, and each of the provinces and Territories. The Overcoverage Study (persons incorrectly enumerated or counted more than once) estimates the overcoverage error. The Reverse Record Check and the Overcoverage are taken together to estimate the net undercoverage. Population estimates based on the 2001 Census including net undercoverage should be available in September 2003.

Random Rounding

It is also important to note that Statistics Canada applies a procedure known as "Random Rounding" in order to ensure confidentiality standards are met. This procedure randomly rounds the population counts (including totals) either up or down to a multiple of 5 or, in some cases 10. As a result, there are instances where the sum of the values will not equal the total listed.

Incomplete or Unenumerated Indian Reserves

In Manitoba, the Indian Reserve Dakota Tipi 1 (North Central Region) was unenumerated in the 2001 Census. In the 1996 Census both Dakota Tipi 1 and Jackhead 43 (North Region) were unenumerated. In the 1991 Census Roseau Rapids 2A (Southeast Region), Roseau River 2 (Southeast Region) and Valley River 63A (Parklands Region) were unenumerated.

Included in the Aboriginal population are those persons who reported identifying with at least one Aboriginal group, i.e. North American Indian, Métis or Inuit (Eskimo) and/or who reported being a Treaty Indian or a Registered Indian as defined by the Indian Act of Canada and/or who reported they were members of an Indian Band or First Nation.

- ETHNIC ORIGIN - Refers to the ethnic or cultural group(s) to which the respondent's ancestors belong. Ethnic or cultural origin refers to the ethnic 'roots' or ancestral background of the population, and should not be confused with citizenship or nationality.

  Comparability of ethnic origin data between censuses prior to 1996 has been affected by several factors including changes in the question format, wording, examples, instructions and data processing, as well as by the social environment at the time of the census.

SINGLE ORIGIN - Represents the total number of persons who reported only one ethnic origin in the census.

MULTIPLE ORIGIN - Represents the total number of persons who reported more than one ethnic origin in the census.

- OCCUPIED PRIVATE DWELLINGS

BY TENURE - For historical and statutory reasons, shelter occupancy on Indian reserves does not lend itself to the usual classification by standard tenure categories (i.e., "owned" and "rented"). Therefore, in 1991, a special category, "Band housing", was created and also used in 1996. In 1986, dwellings on Indian reserves were all classified in the "On Reserve" category. Previous to 1986, dwellings on Indian reserves were classified as being owned or rented.

BY PERIOD OF CONSTRUCTION - 1996 to 2001 includes data up to May 15, 2001.

Note: Figures presented in tables may not add to the totals due to random rounding.
